

Joëlle BARIDO-SOTTANI

Taming the BEAST Organizer & Instructor
Permanent Researcher (ENS-PSL, Paris, France)
Languages – French, English

Birth-death processes for Bayesian phylogenetic inferences

Minghao Du (杜明浩)

Teaching Assistant

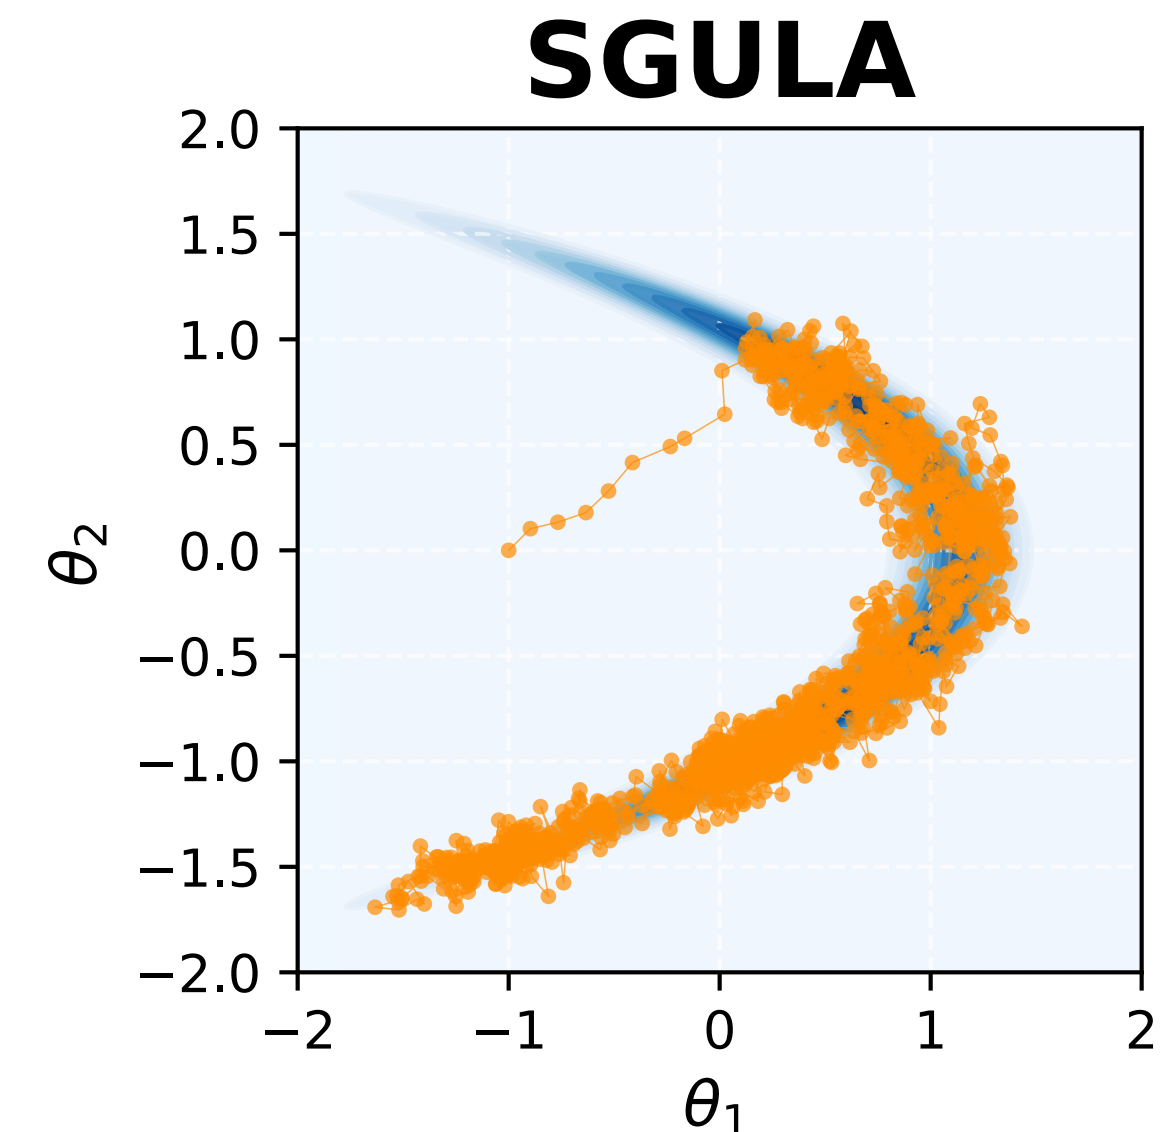

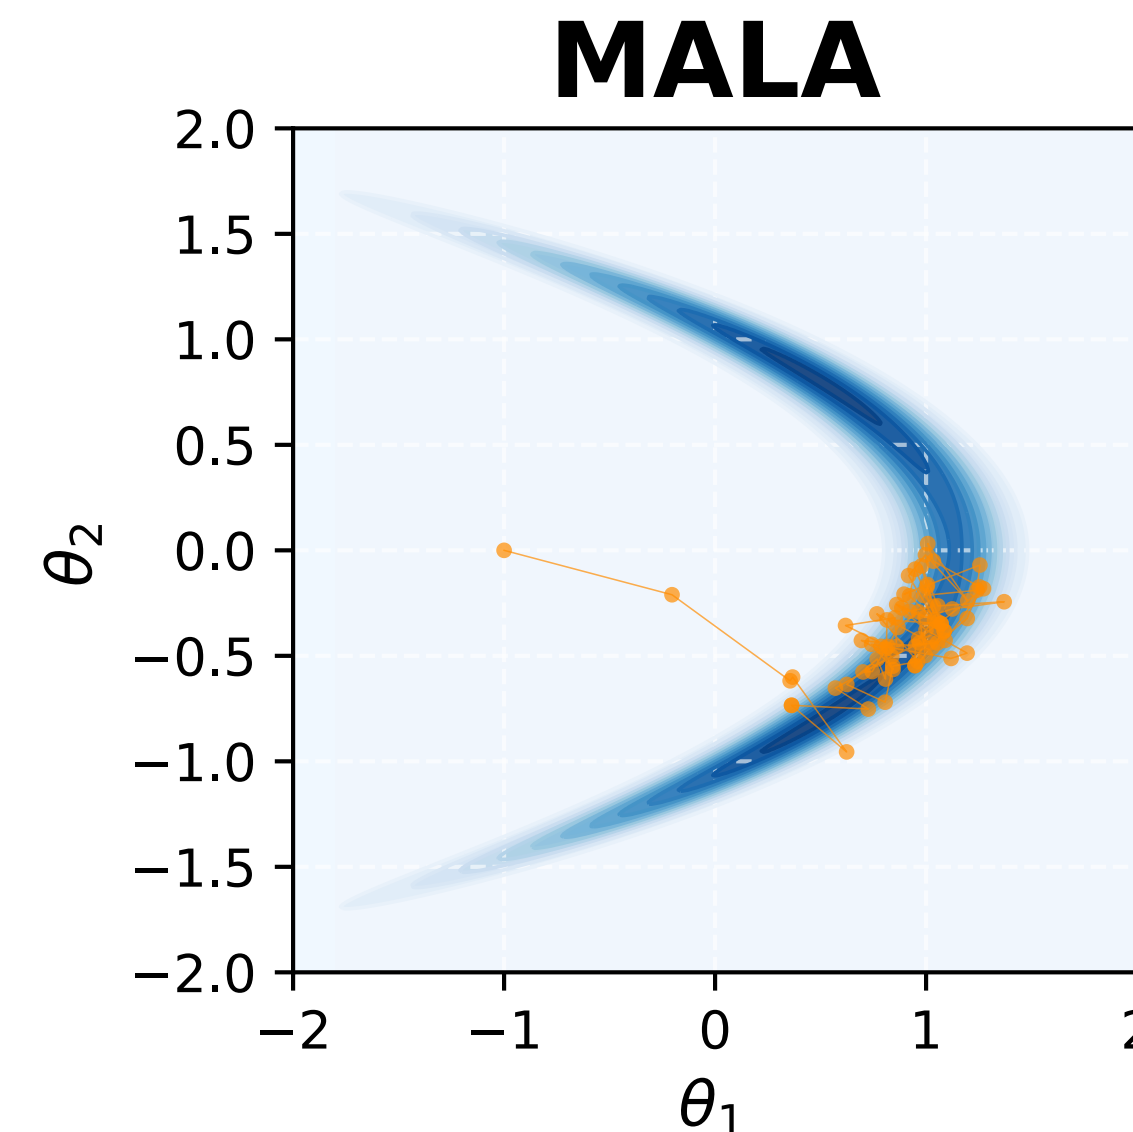

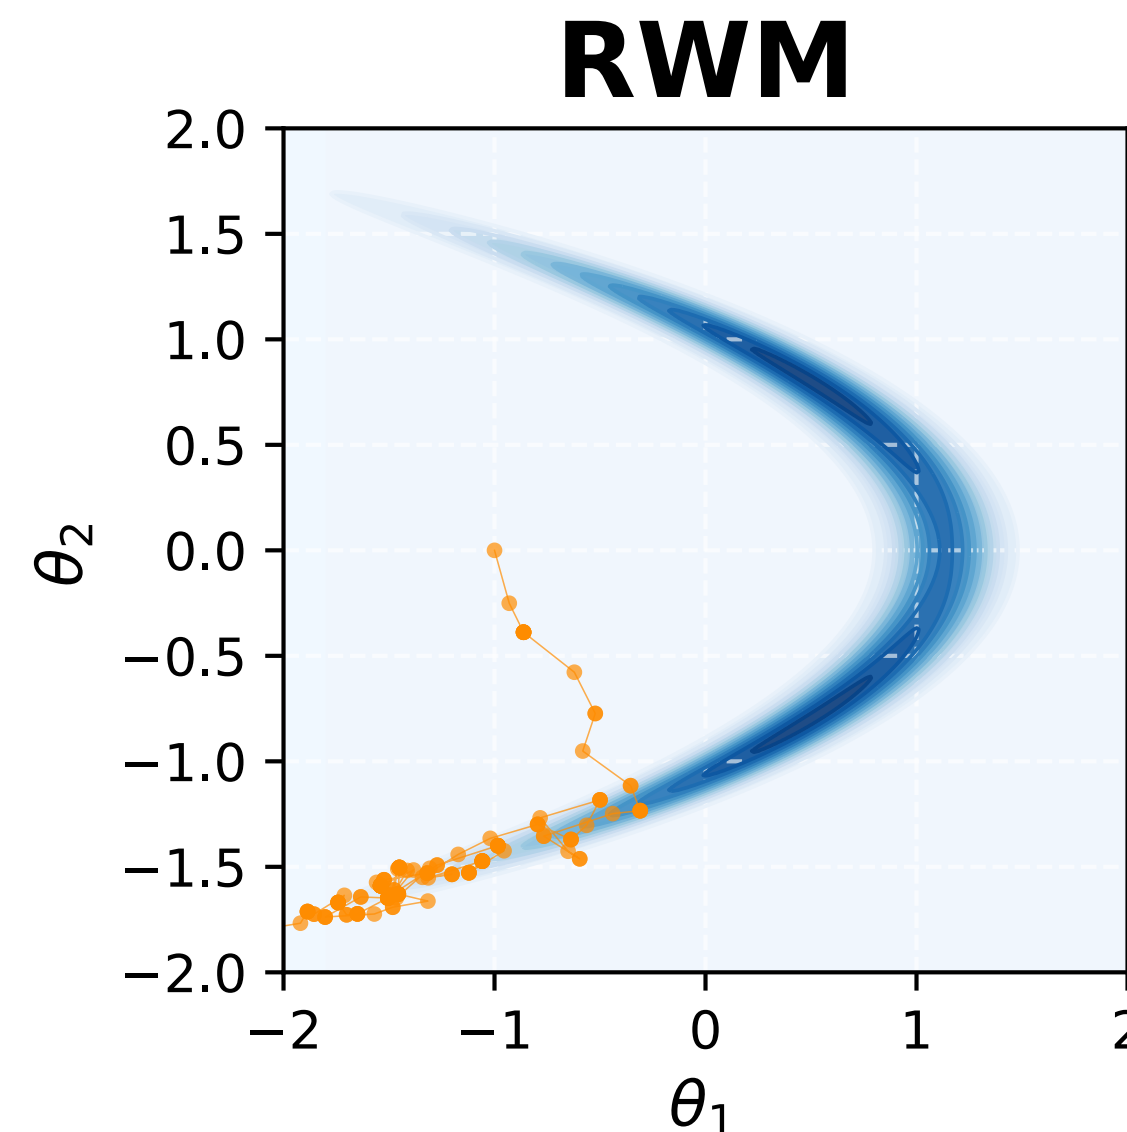

PhD student (Central South University, China;
ENS-PSL, France)

Languages: Chinese, English

Research Interests:

- Scalable MCMC
- Deep learning
- Phylogenetics

Eva Li

Doctoral Candidate

University of Auckland (New Zealand)

Languages: Chinese, English

Role: Teaching Assistant

Email: yil218@aucklanduni.ac.nz

Research Interest:

- Variant calling on single-cell sequencing data
- Bayesian phylogenetic inference
- Implementation and validation of evolutionary models

Arong Luo

Taming the BEAST Speaker

Associate Professor, Institute of Zoology, CAS

Languages – Chinese, English

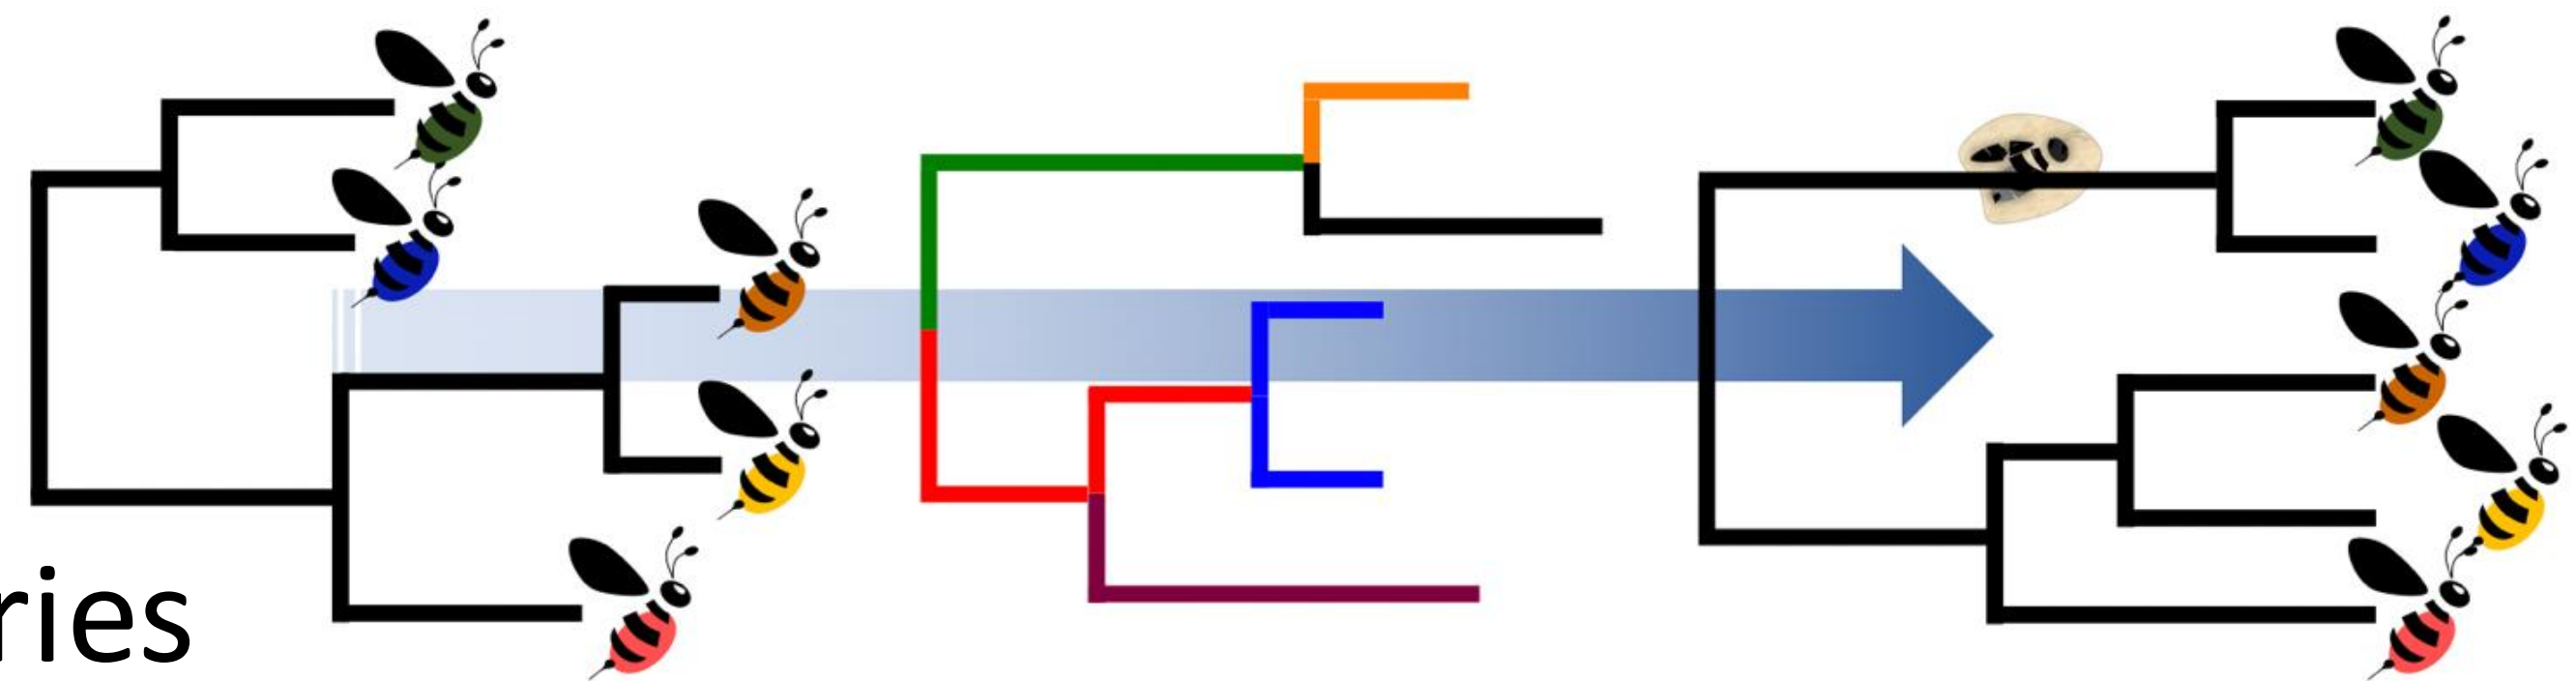

Research Interests:

Molecular phylogenetics and phylogenomics

Molecular clock and tip dating

Molecular species delimitation

Phylogenetic methods and theories

Sasha Gavryushkina

Lecturer in Statistics and Data Science University of Adelaide

Speaker

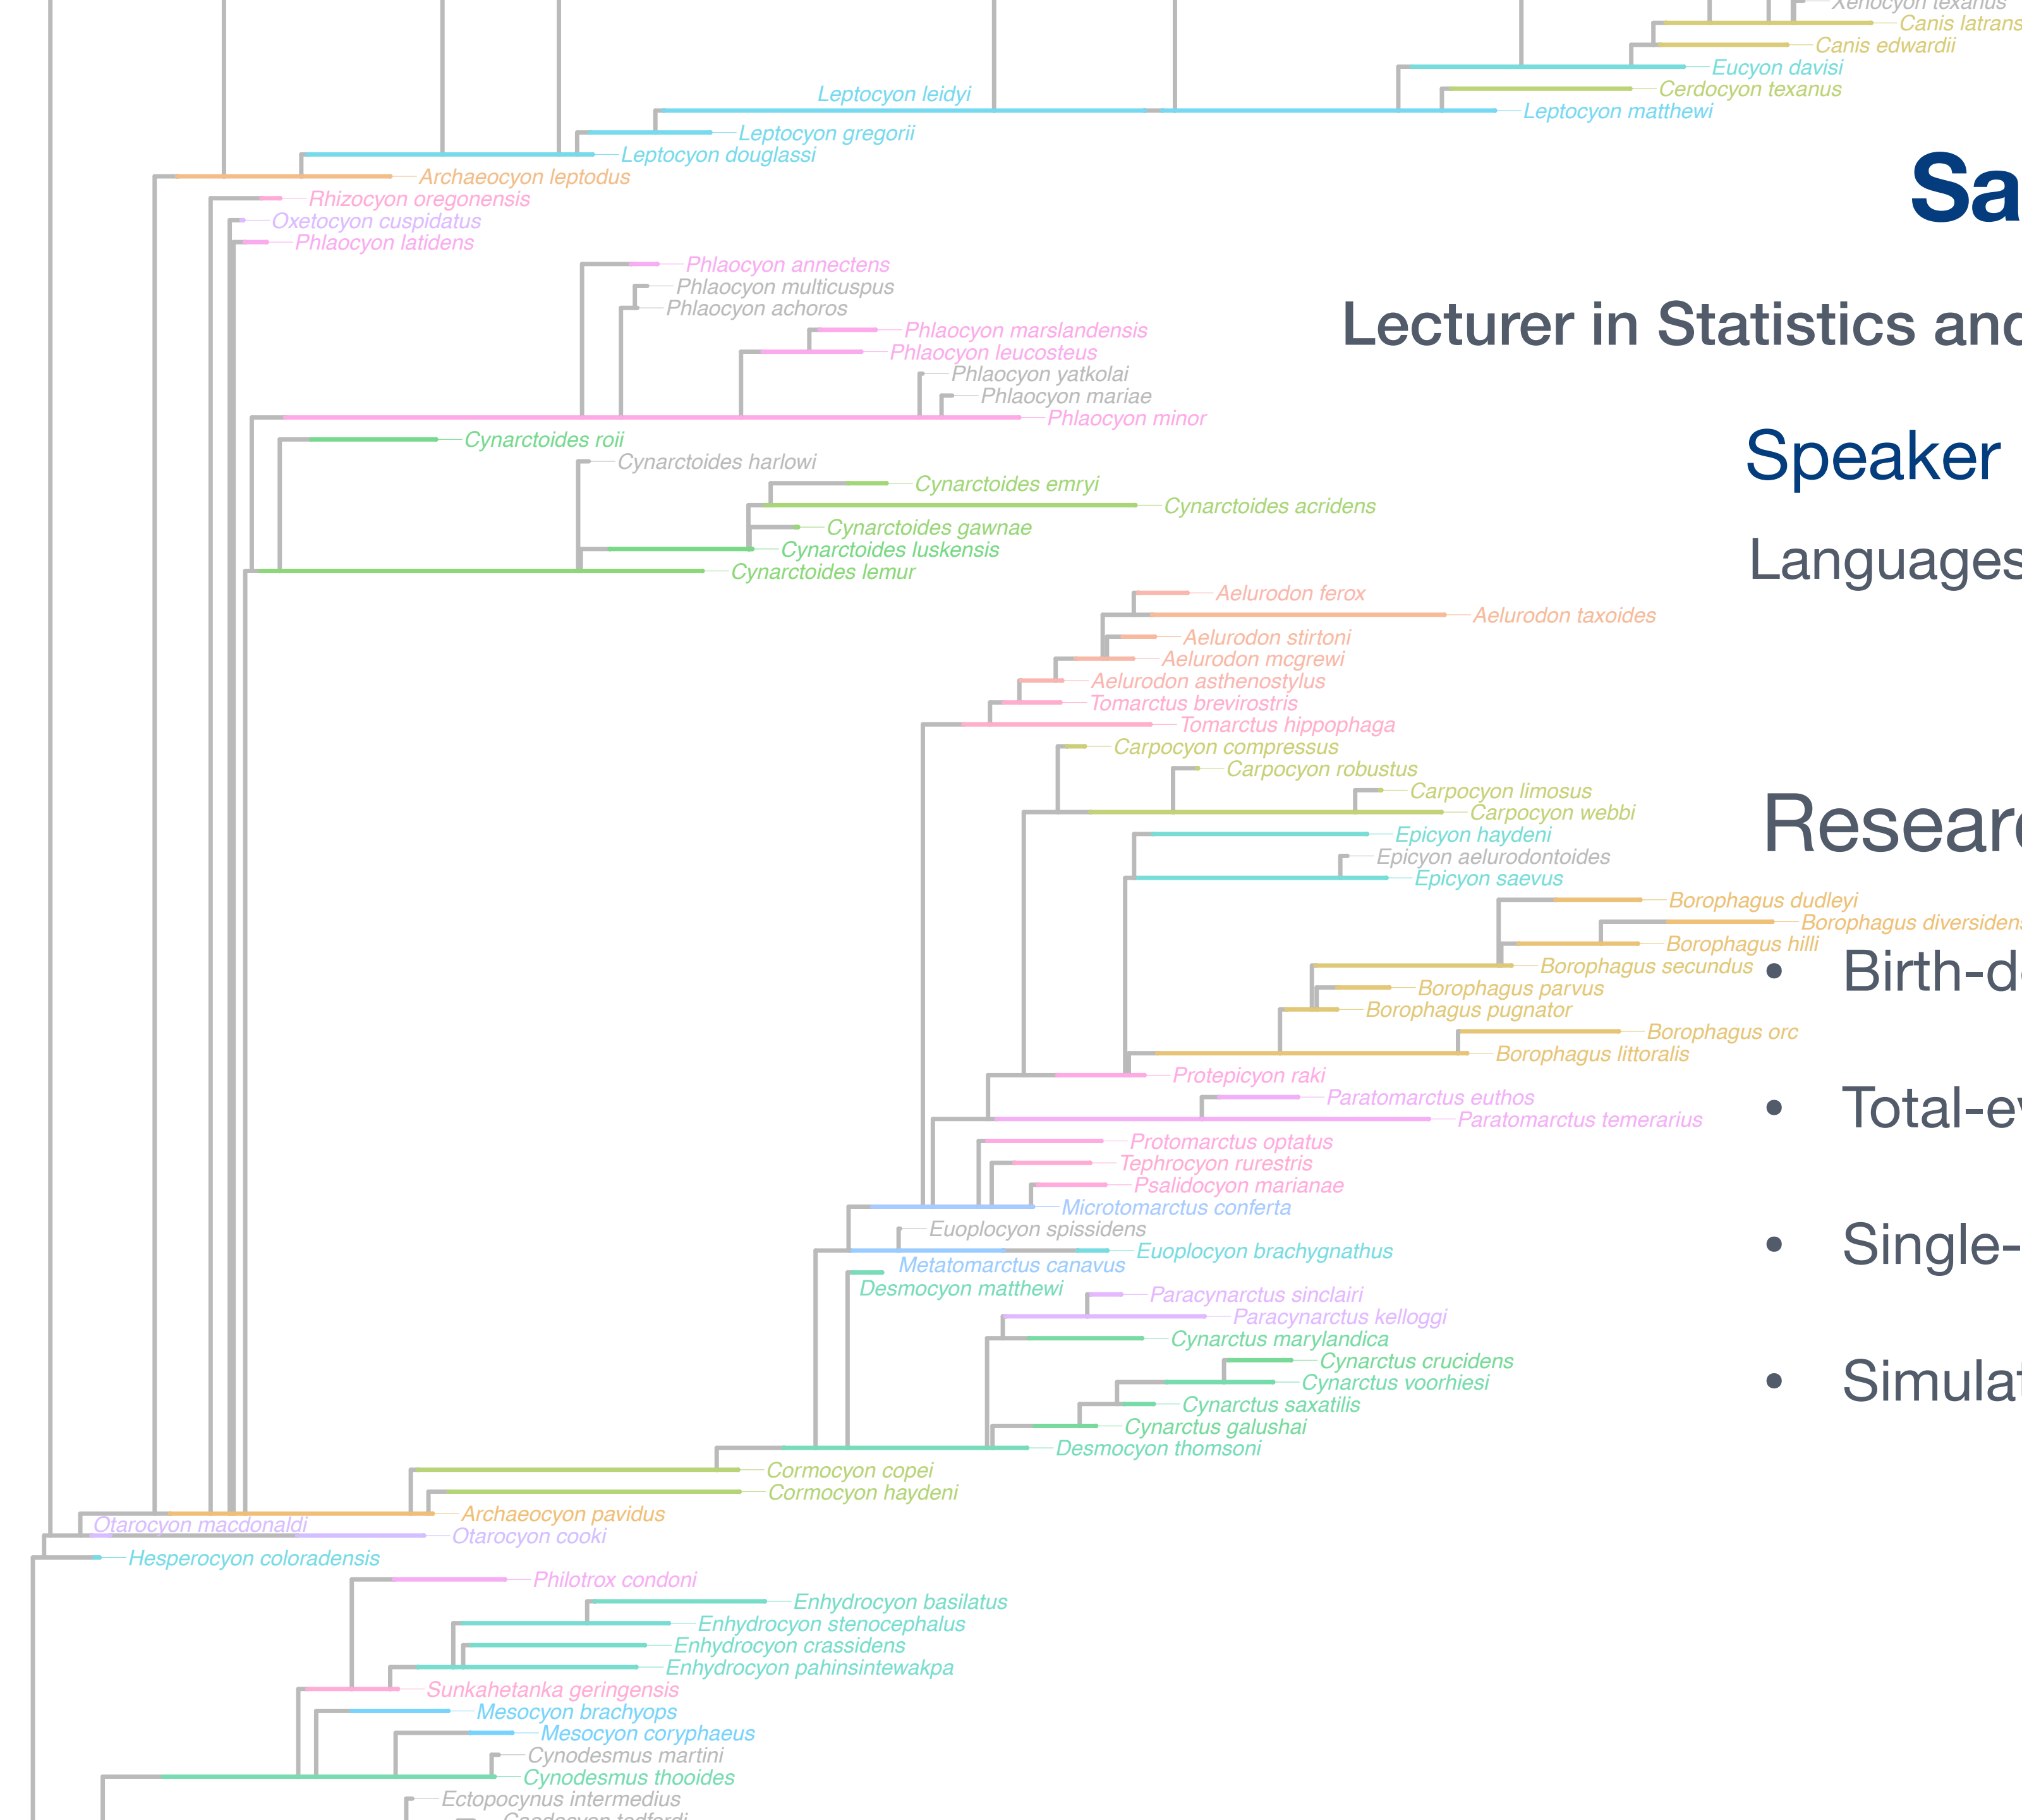

Languages: English, Russian

Research interests:

- Birth-death process
- Total-evidence dating
- Single-cell phylogenetics
- Simulation based inference for phylodynamics

Email: sasha.gavryushkina@adelaide.edu.au

Simon Ho

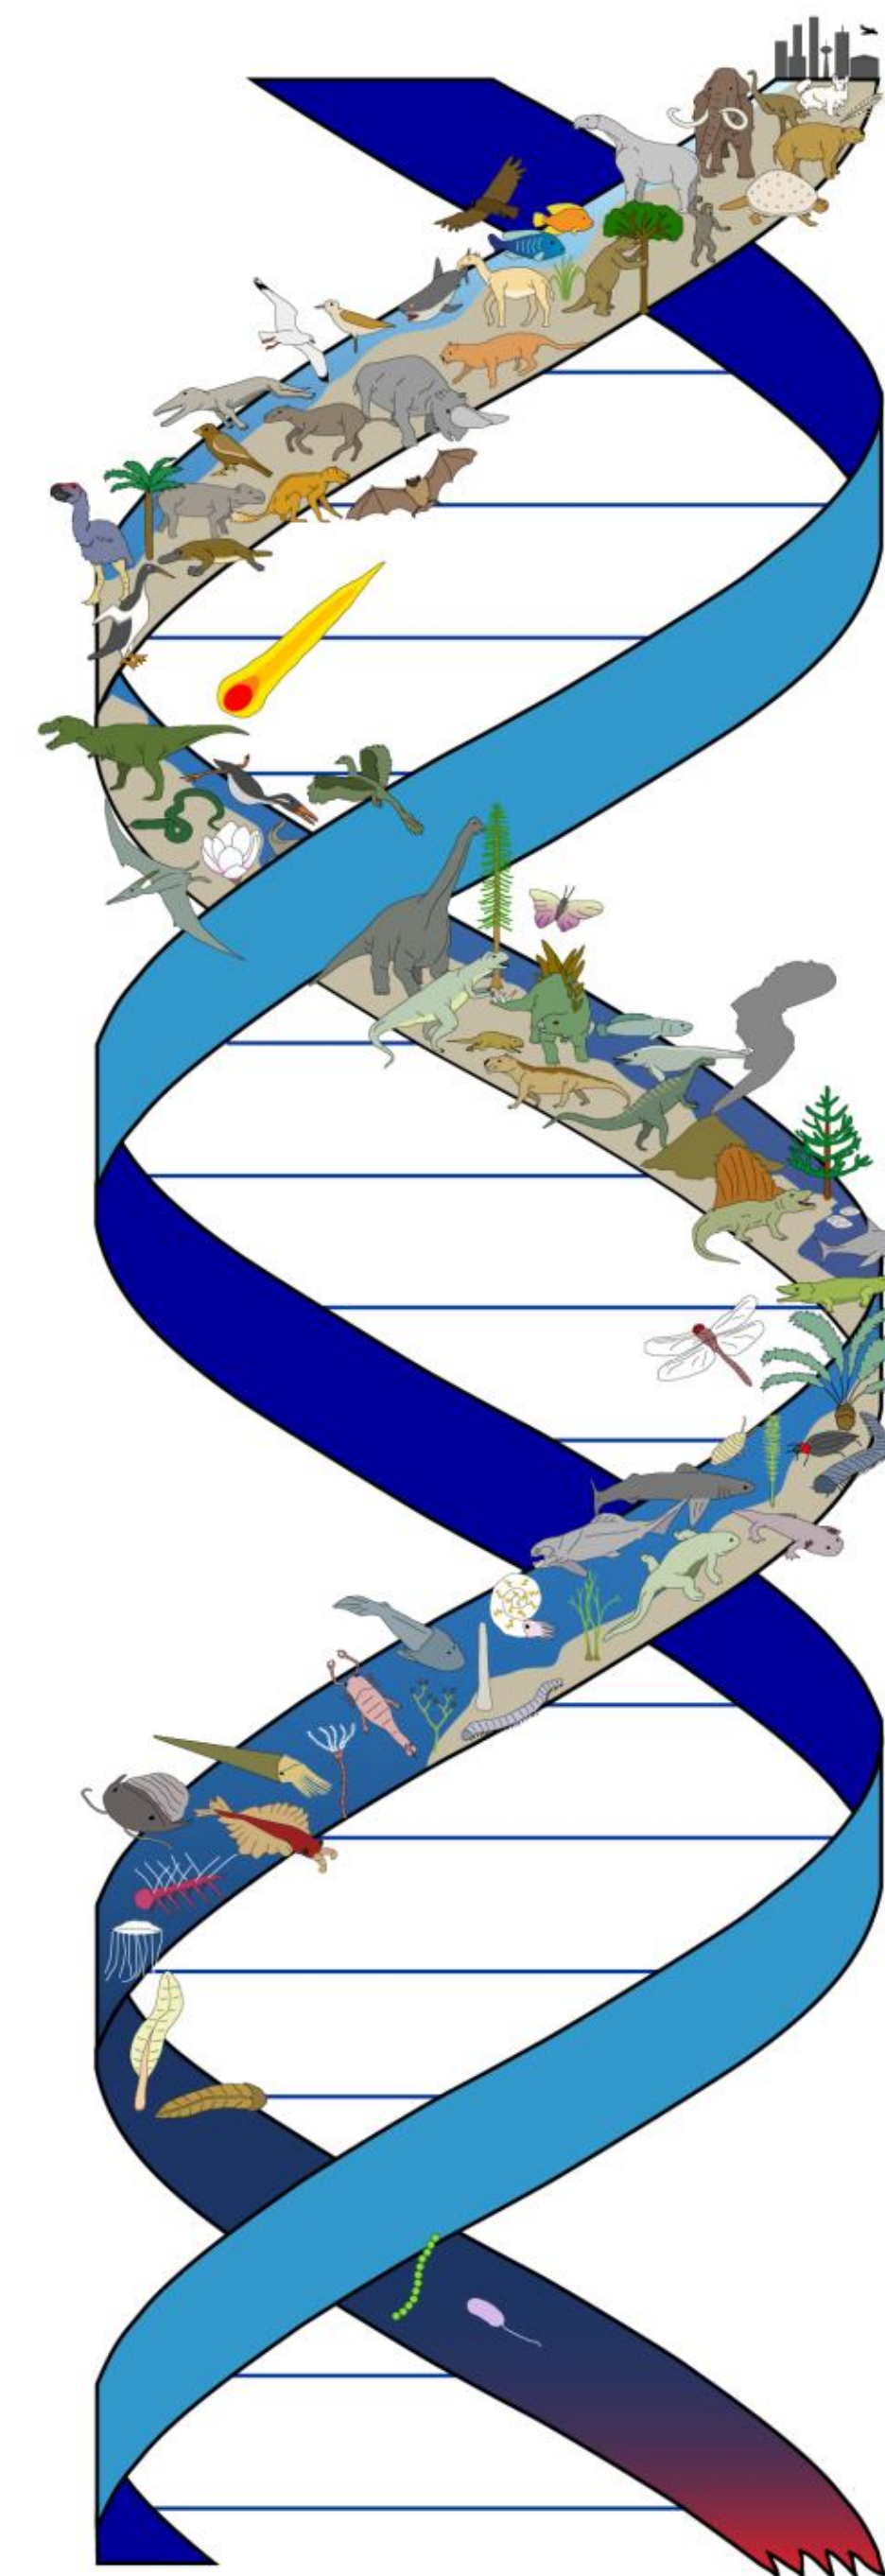

Professor of Molecular Evolution
University of Sydney, Australia

Speaker / Instructor

Languages: English, Cantonese

Research interests:

- Molecular clocks
- Evolutionary rates
- Phylogenomics

Sophie Seidel

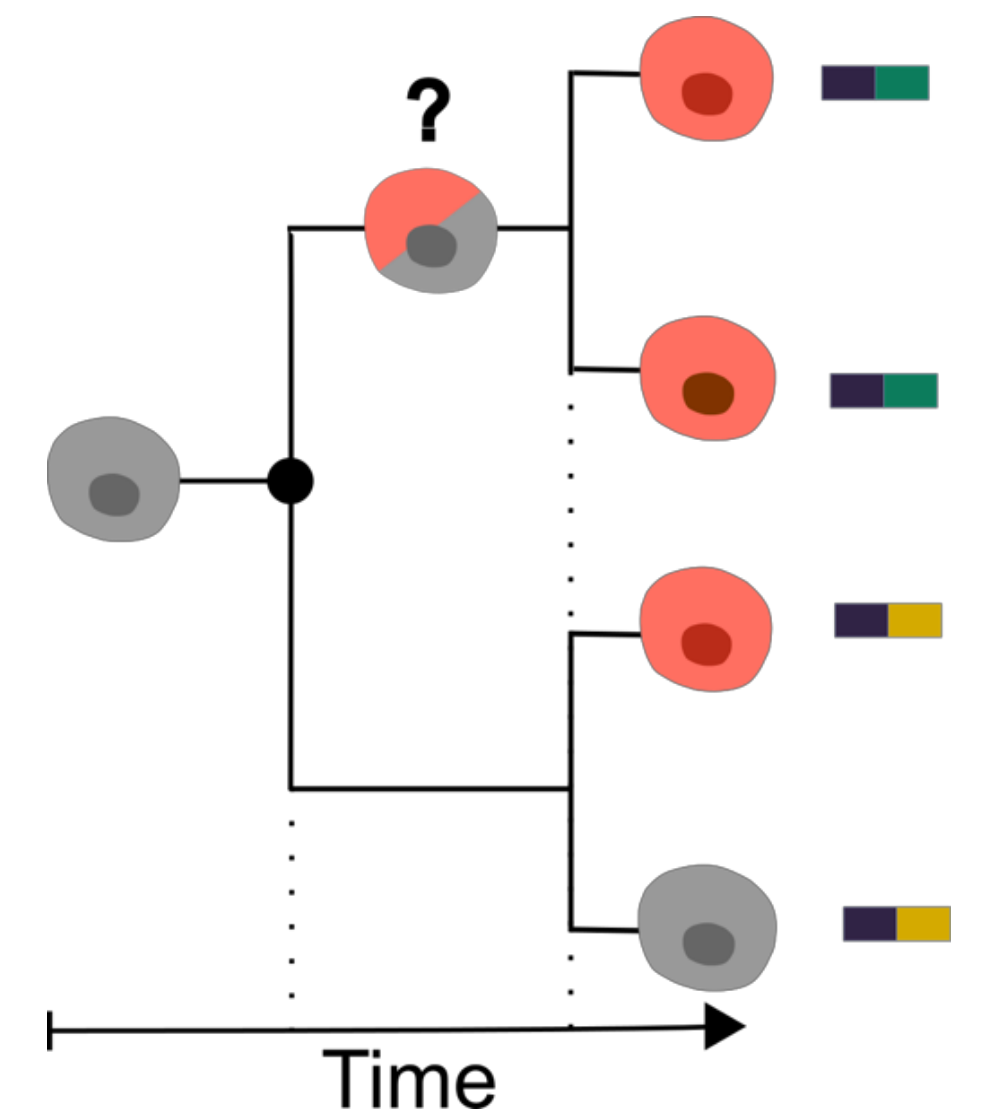

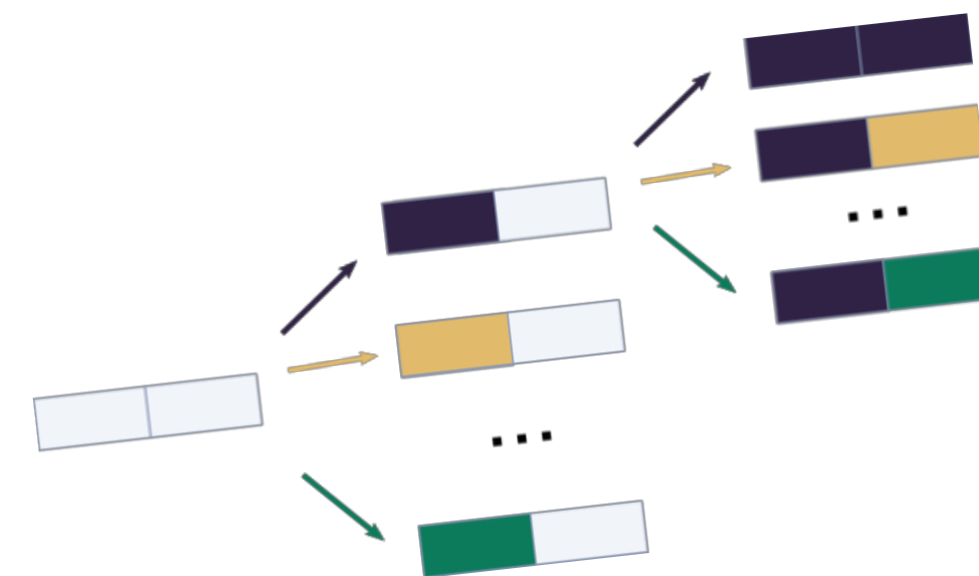

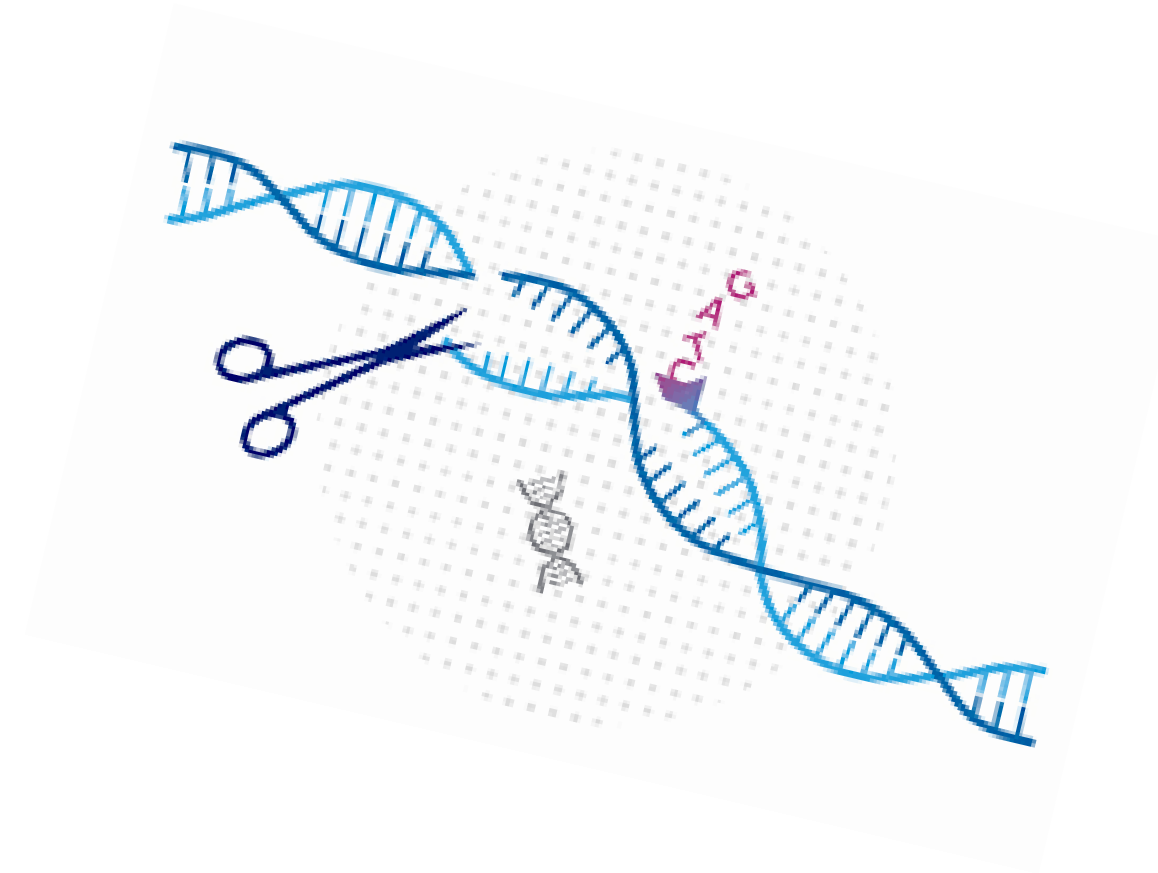

SOH-fee, languages: German,
English

Speaker / Instructor

PostDoc @UW, Seattle, US

Research interests:

- Understanding cell decisions
- Phylogenetic models of genome editing
- Phylogenetics for single-cell applications

Rachel Warnock

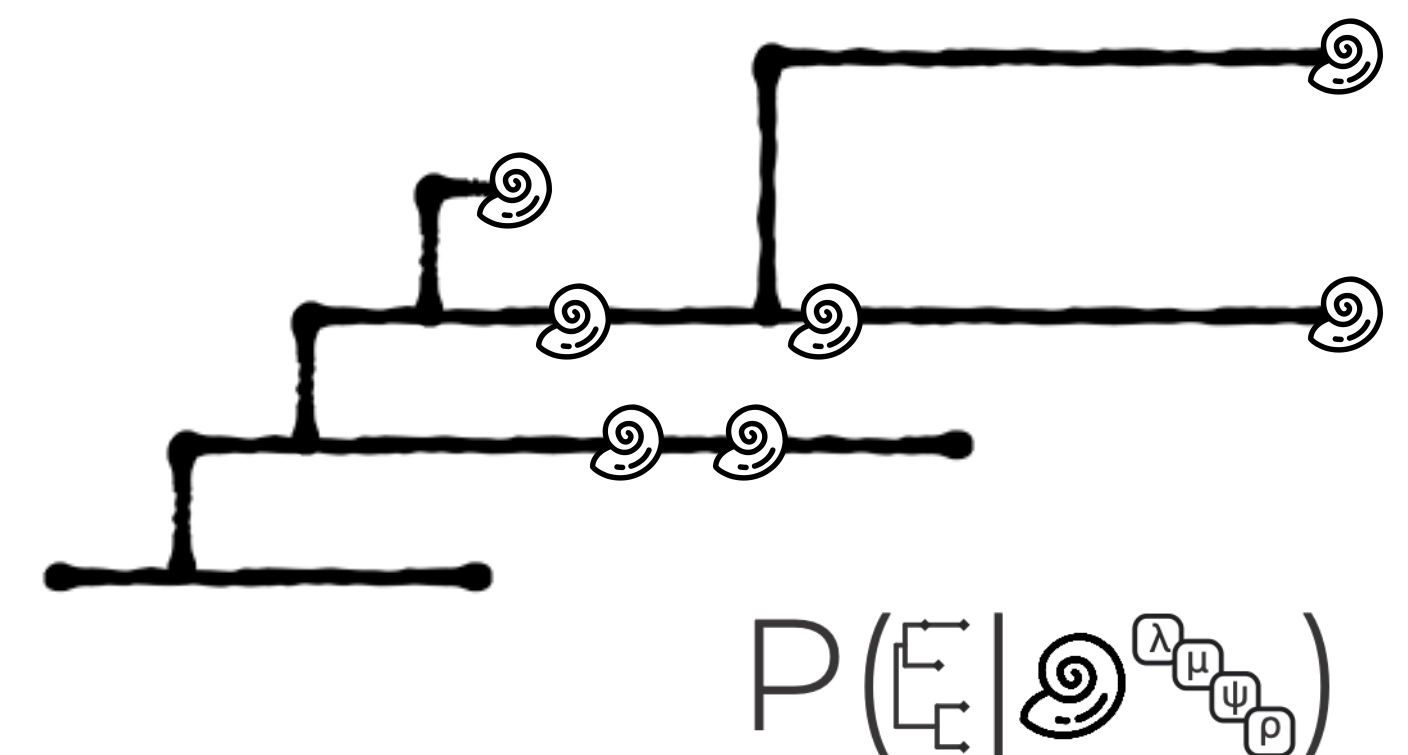

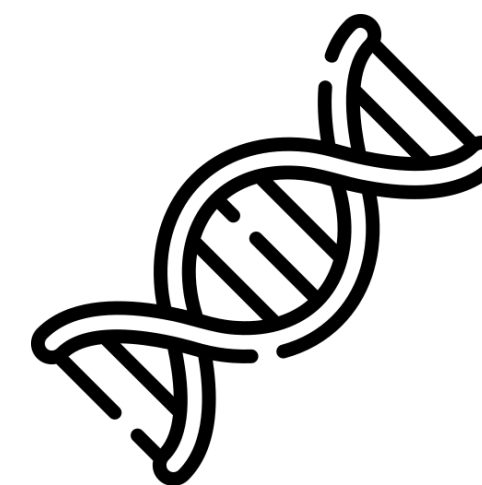

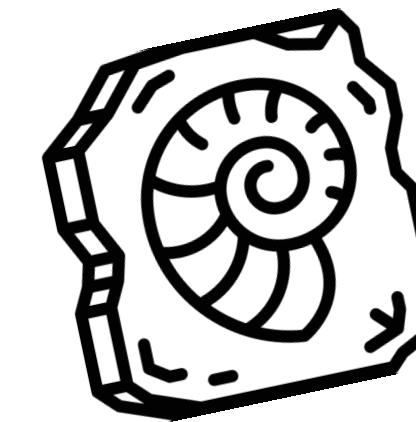

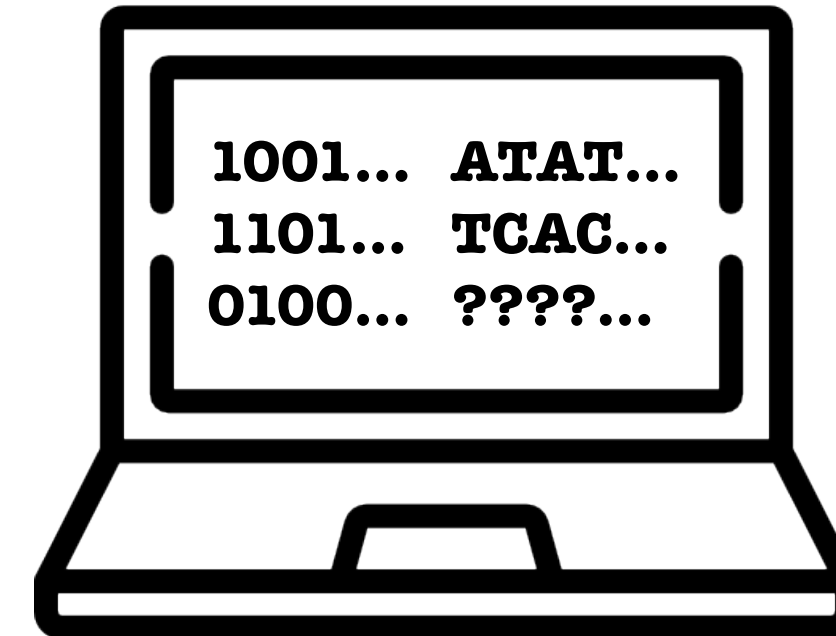

‘ray-chill’, languages: English

Organiser / Speaker / Instructor

Professor of Paleobiology (FAU, Germany)

Research Interests:

- Phylogenetics, especially with fossils!
- Molecular / morphological dating
- Phylodynamics for macroevolution
- Computational paleobiology

Yao Xiao

Teaching Assistant

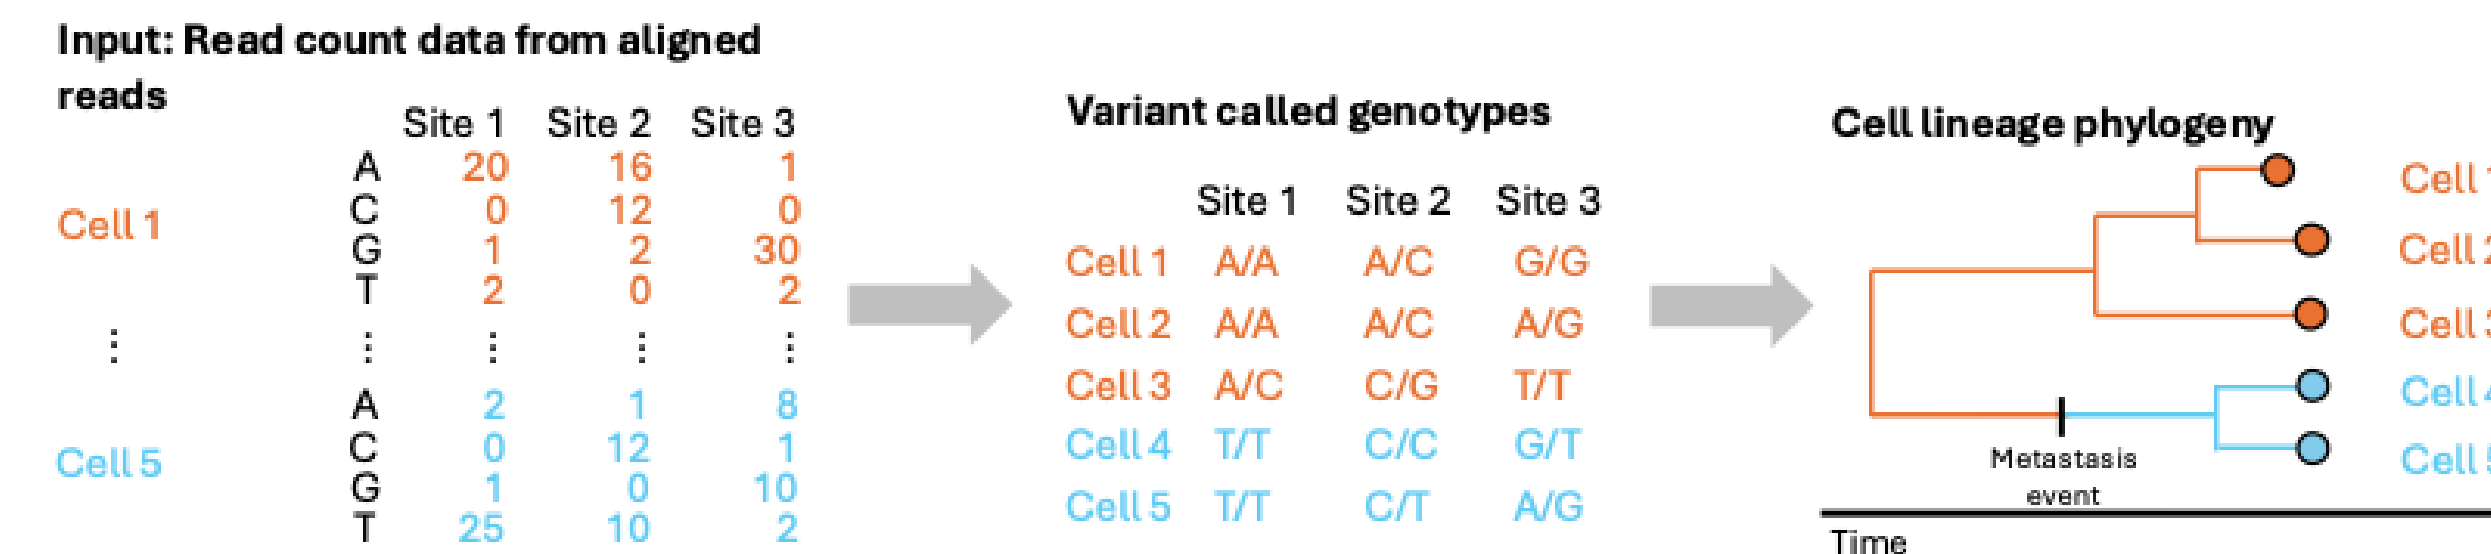

Languages: Chinese, English

PhD Candidate (UoA, New Zealand)

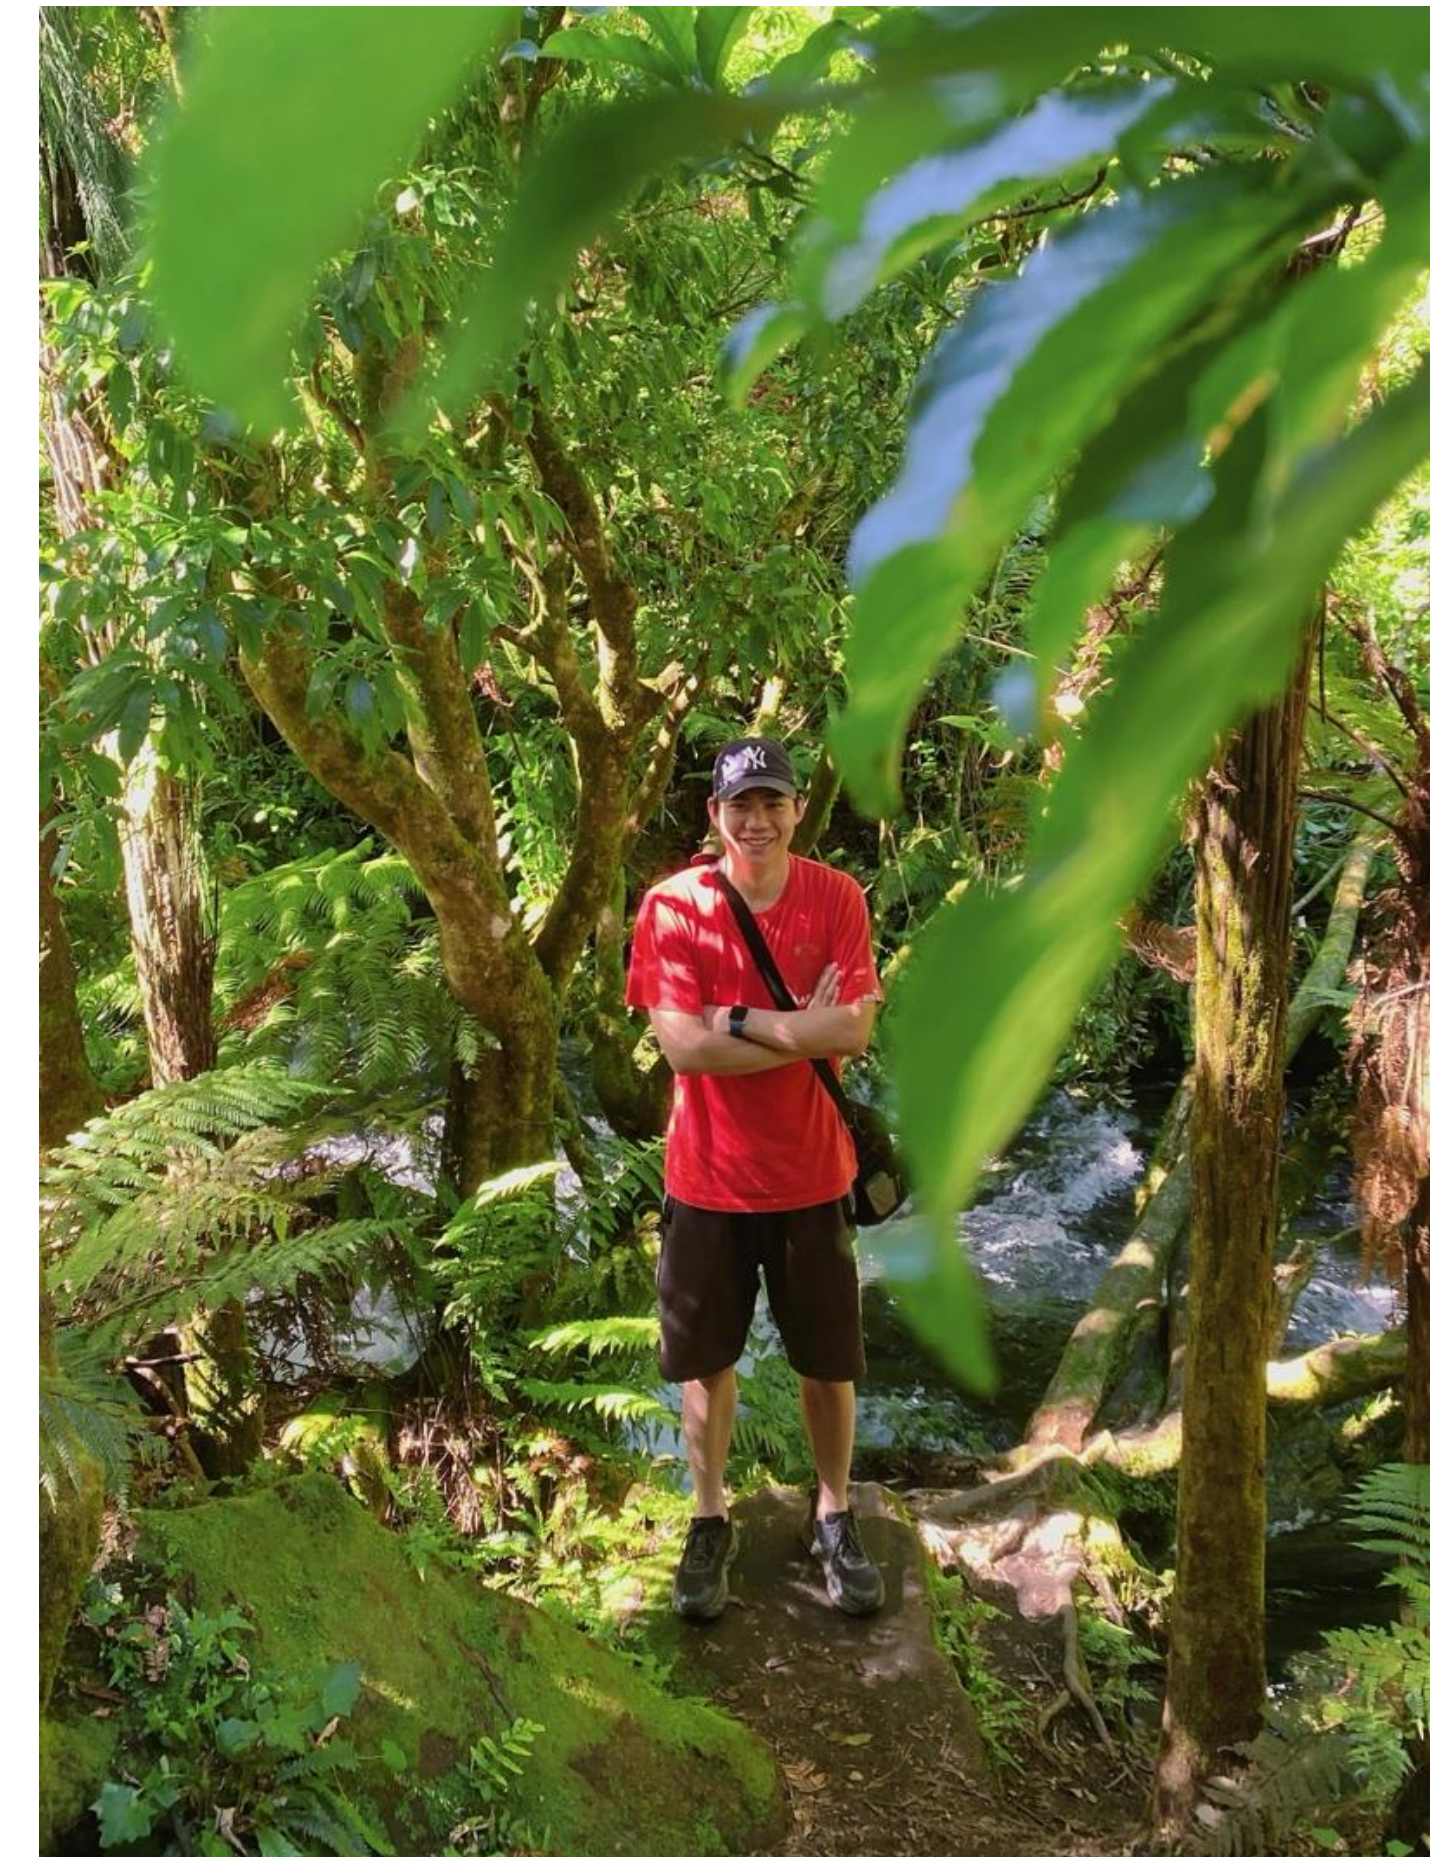

Research Interests:

- Phylogenetics
- Cancer Evolution
- Computational Biology

E-mail: yxia415@aucklanduni.ac.nz

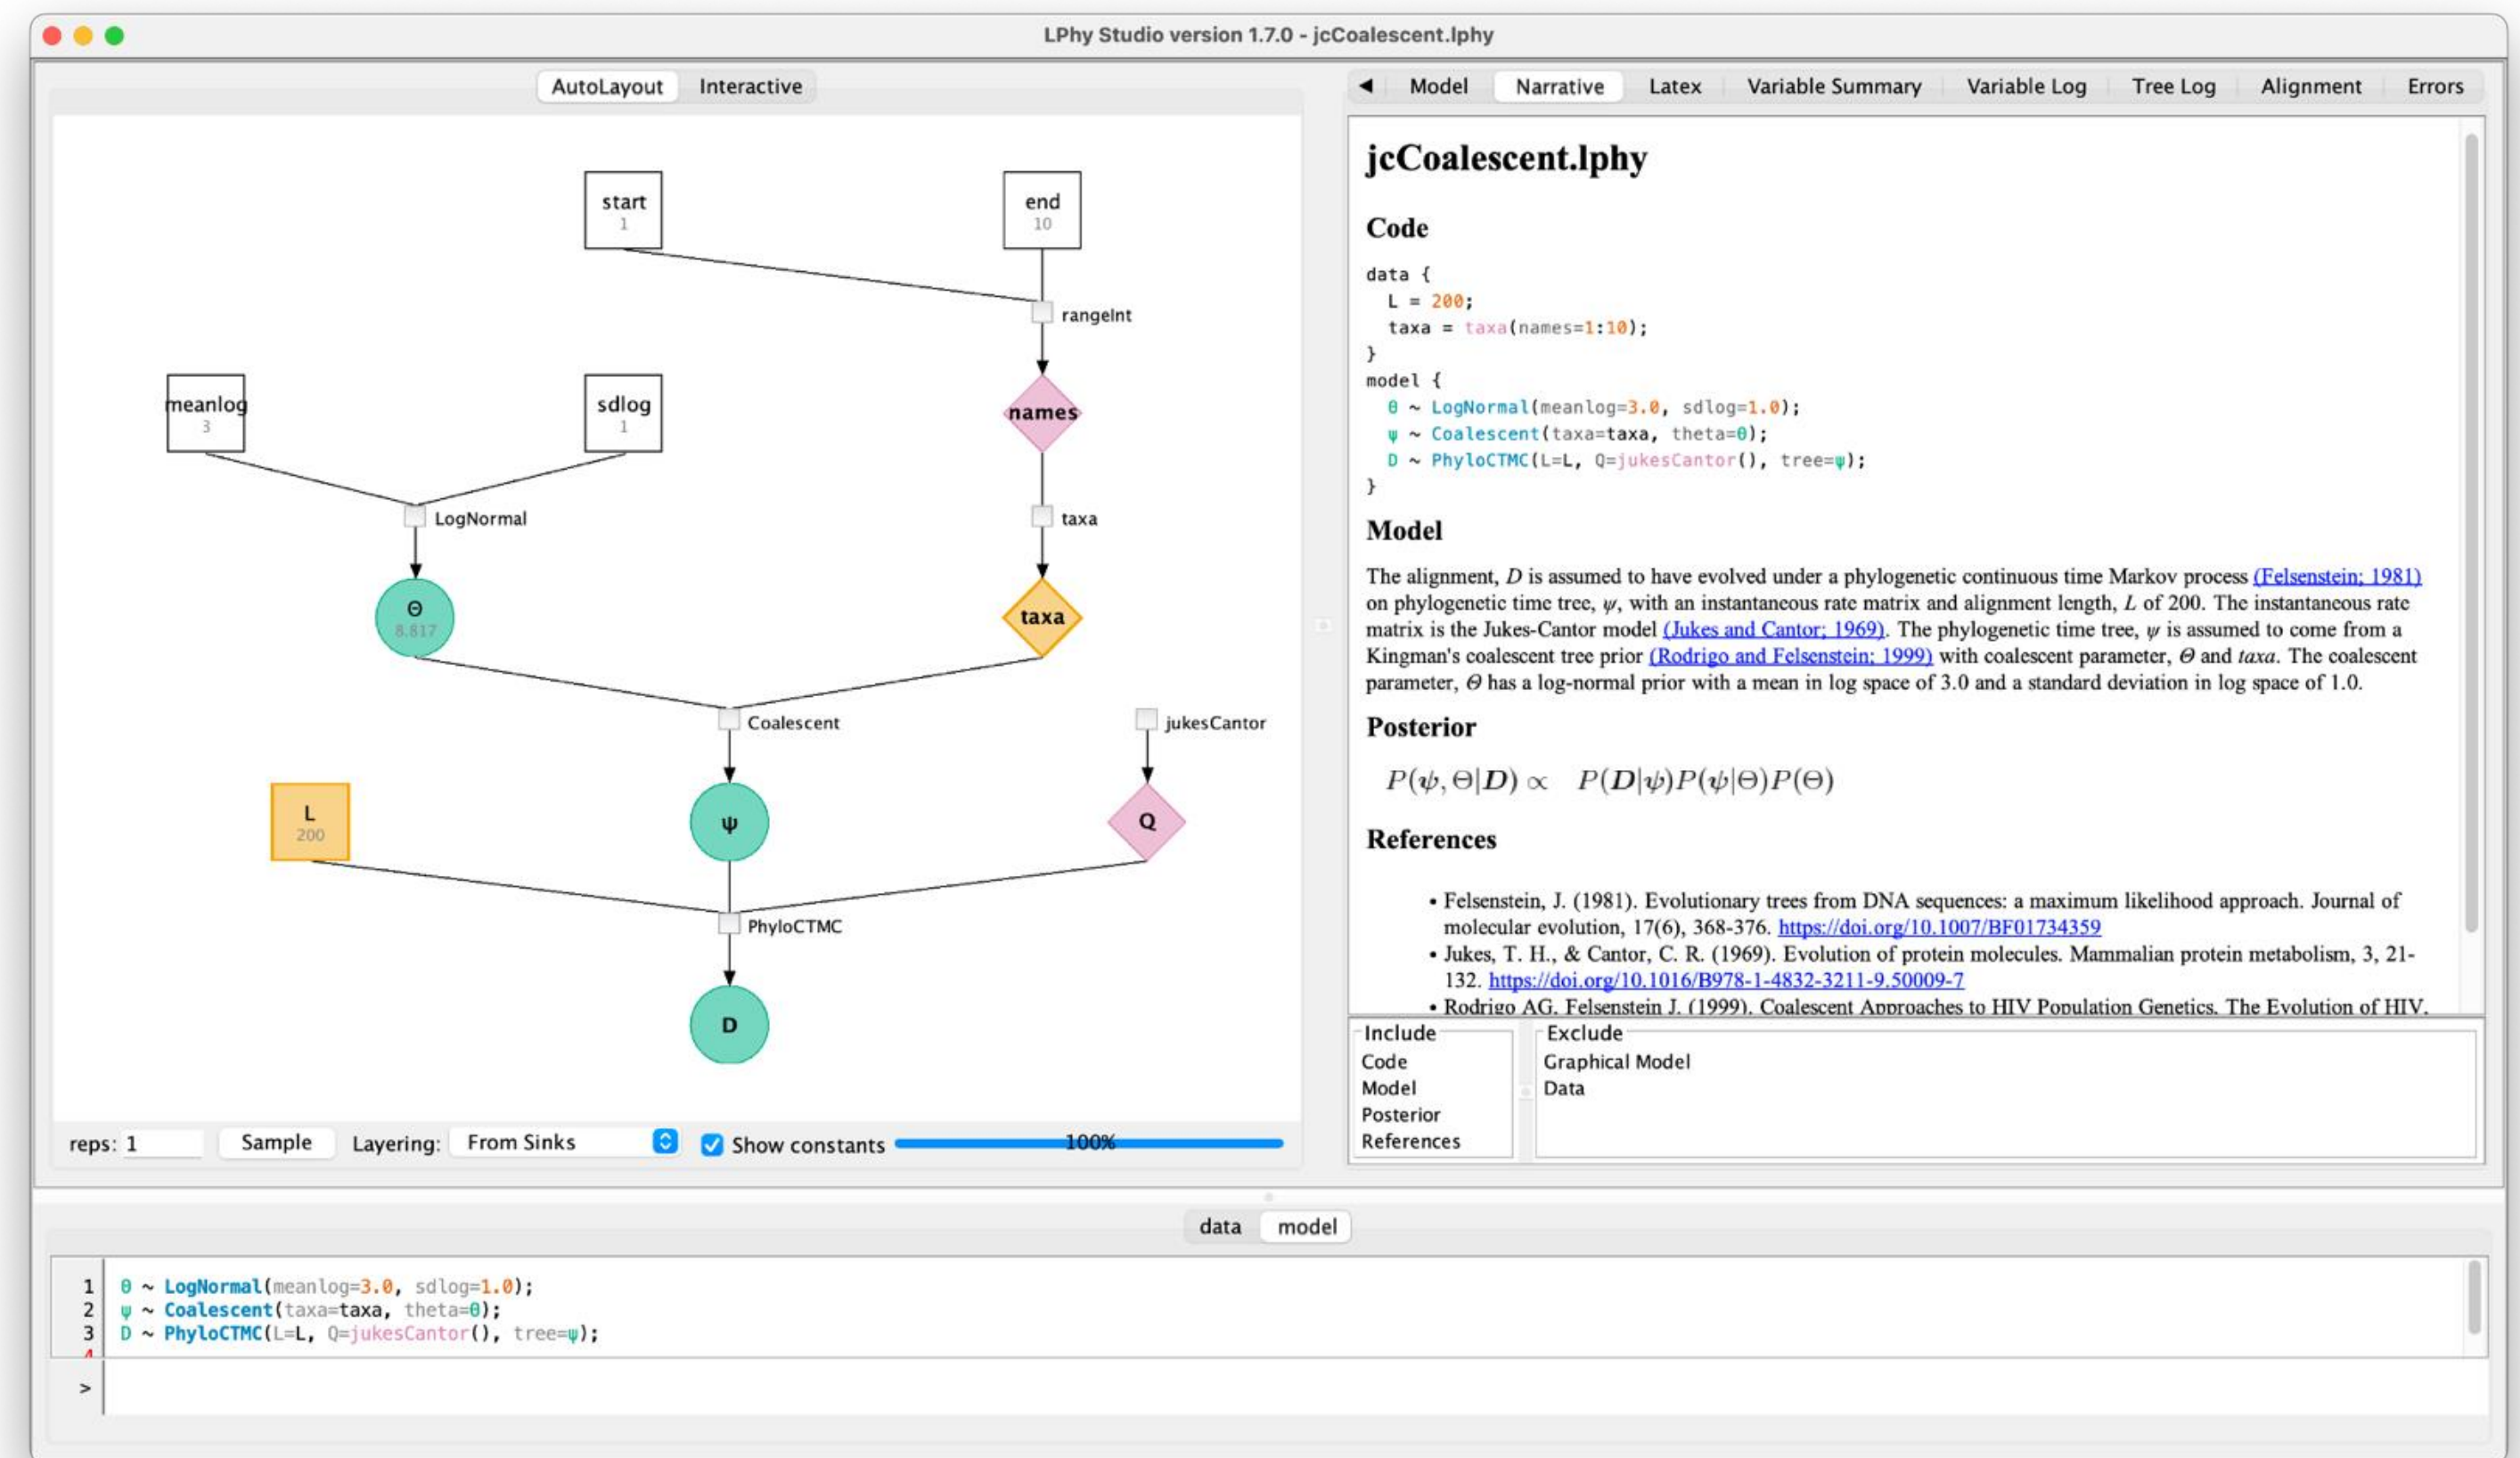

Joint inference of variants and phylogeny from scDNA-seq read counts

Dr. Walter (Dong) Xie

Taming the BEAST
instructor

Language: Mandarin
& English

The Centre for Computational Evolution, University of Auckland, New Zealand

Dr. Walter (Dong) Xie

Research Interests:

System development, data analysis, IT solutions and AI applications for phylogenetics (including phylogenomics), as well as bioinformatics and computational biology.

Publications: <https://scholar.google.co.nz/citations?hl=en&user=-YfKWT4AAAAJ>

Software:

LPhy

BEAST 2

Tracer

BEAST 1 (v1.5.x - v1.7.x)

More projects : <https://github.com/walterxie>

Jiabao Xing

Pronounce: “jar-boar”

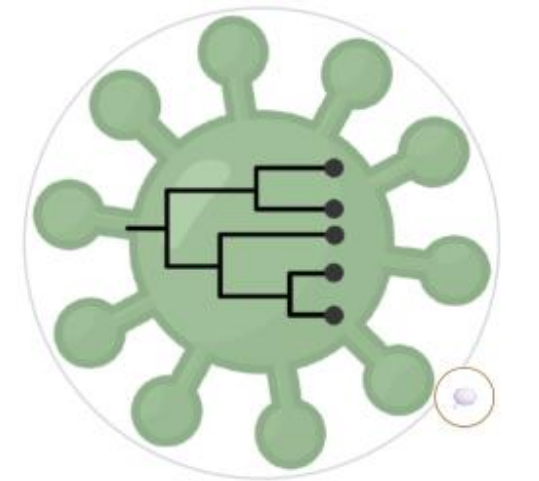

PhD candidate from Fudan University (FDU, China), School of Public Health

Supervisor: Prof. Hongjie Yu (FDU, China) and Guy Baele (KU Leuven, Belgium)

Role: TA

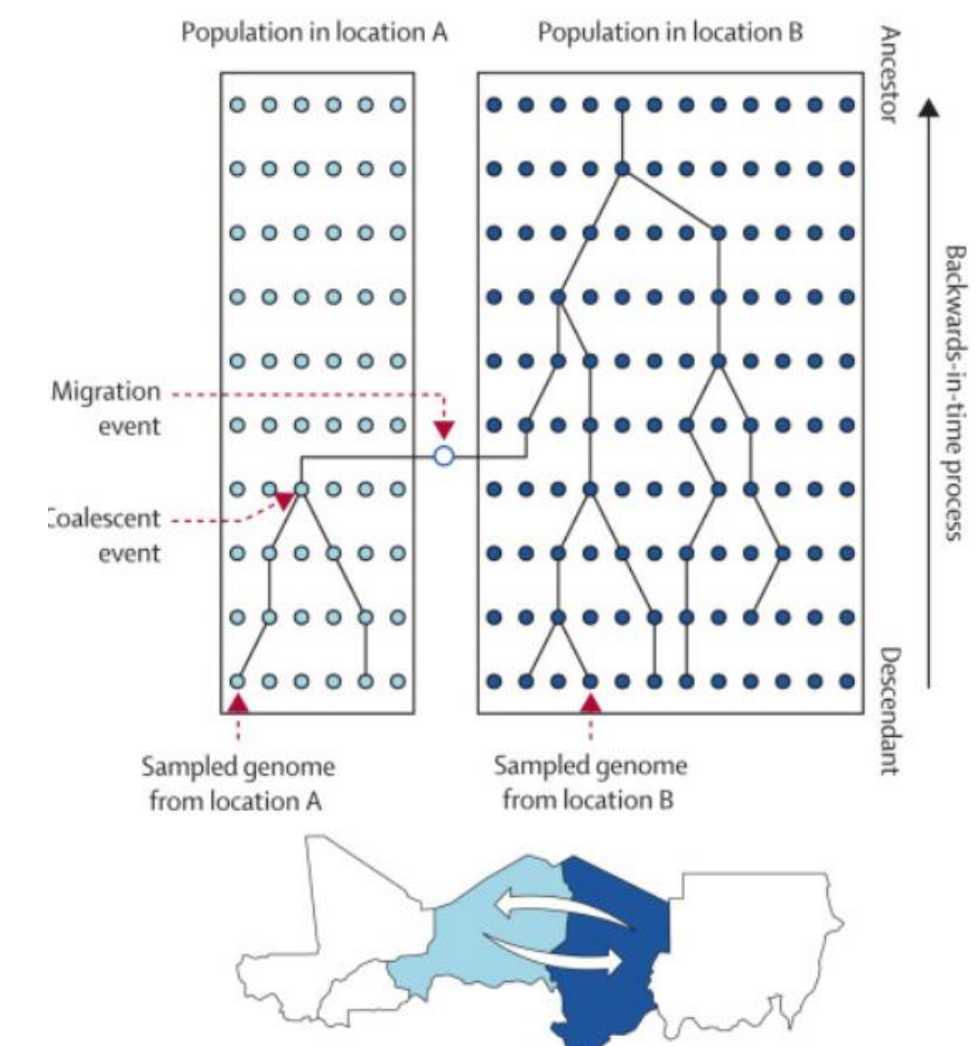

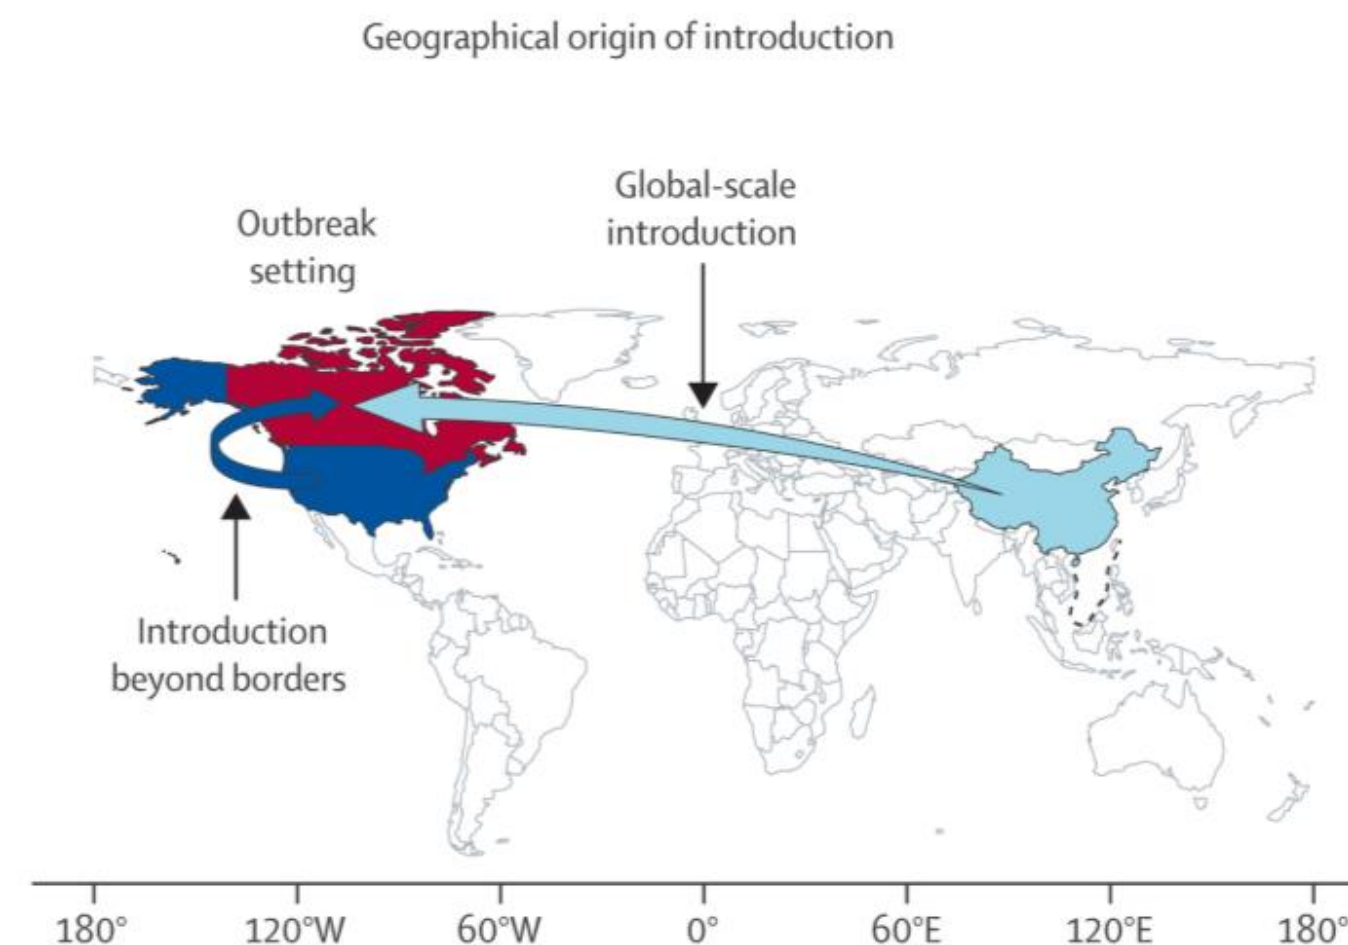

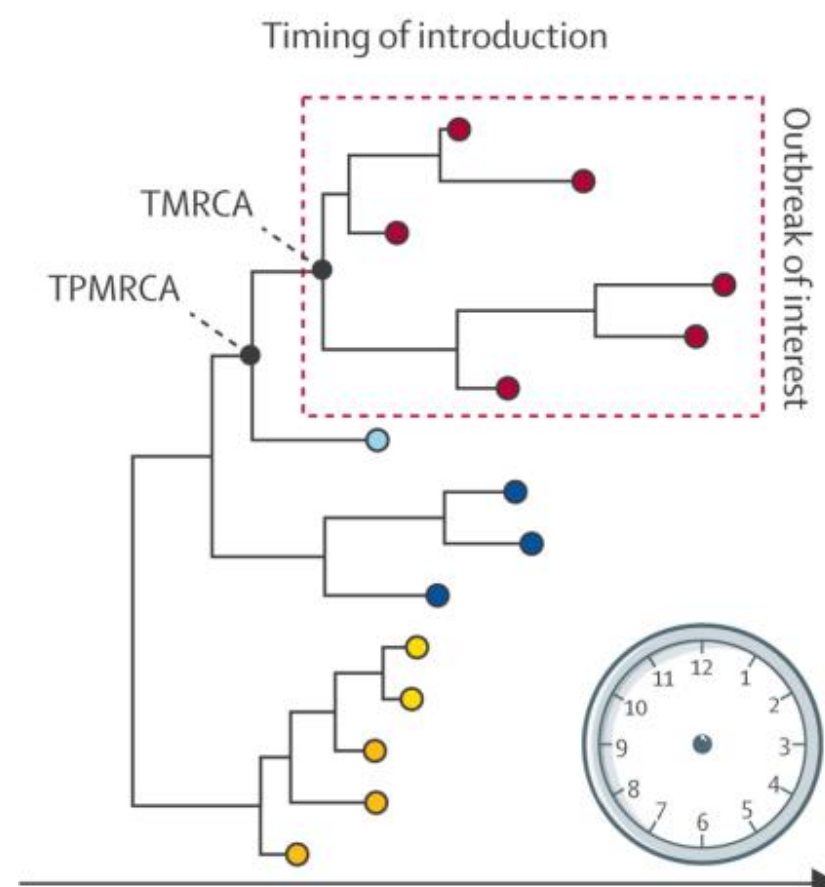

Language: Chinese, English

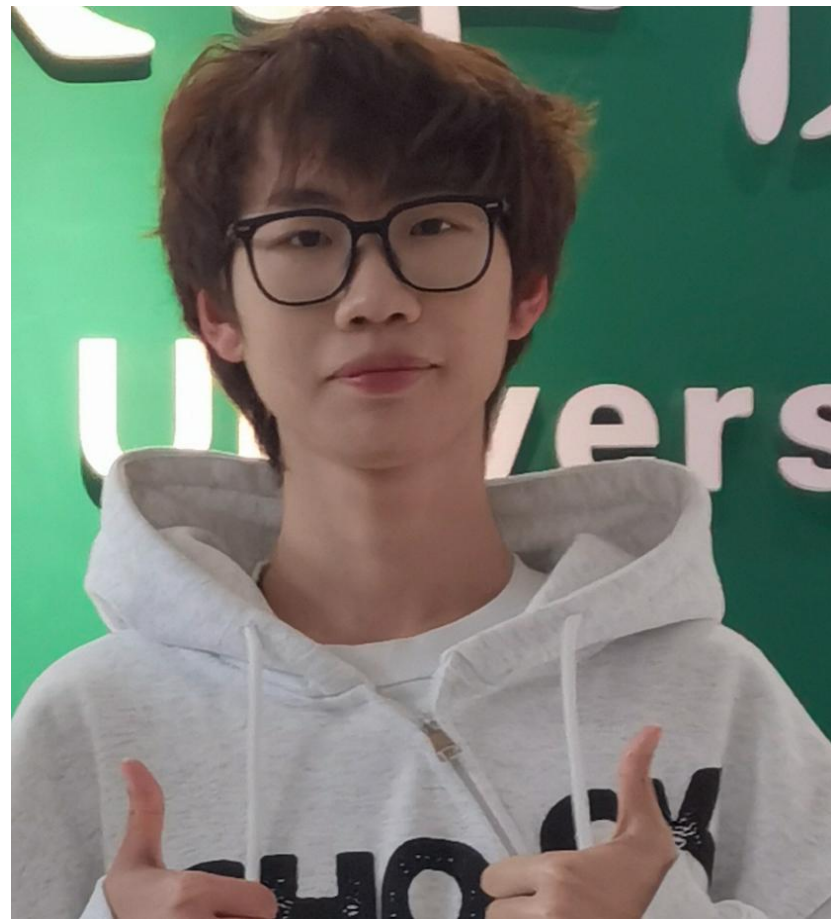

Research interests:

Phylodynamics, structured coalescent and birth-death process of pathogens

Phylogeographic, focusing on spatiotemporal transmission of pathogens (AIV, MeV, and PRRSV)

Yuan Xu

Taming the BEAST Teaching Assistant

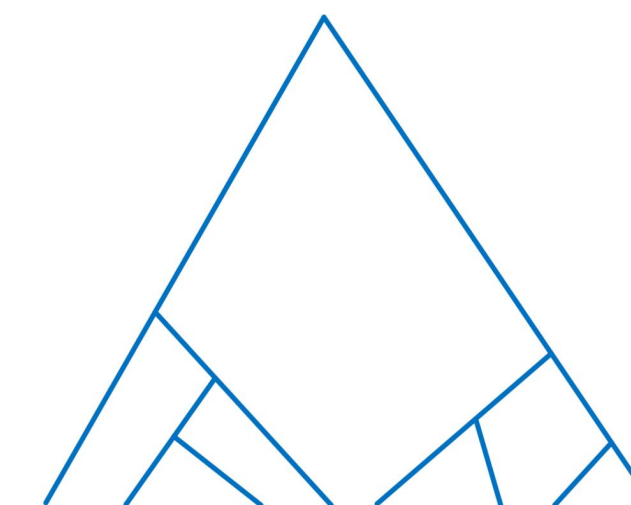

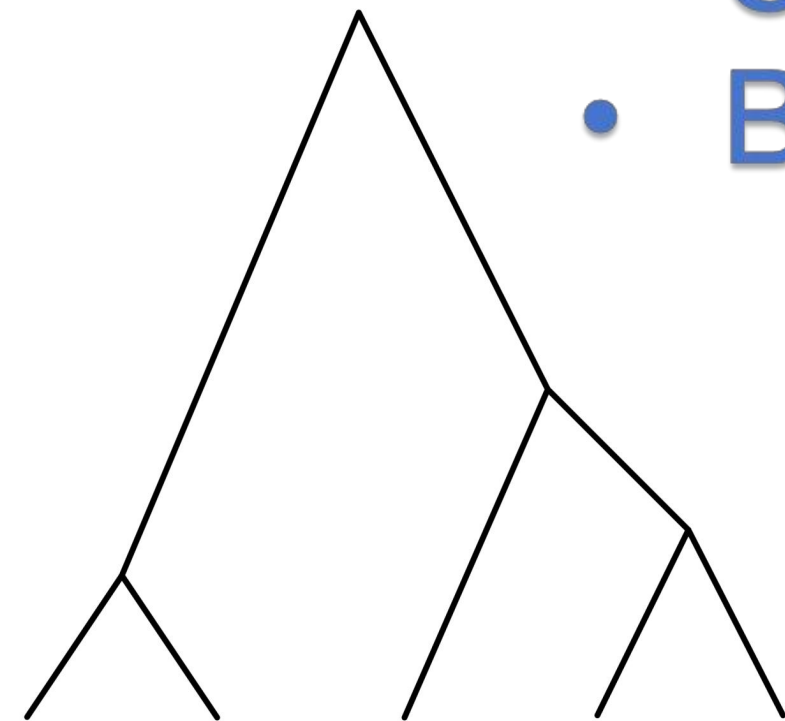

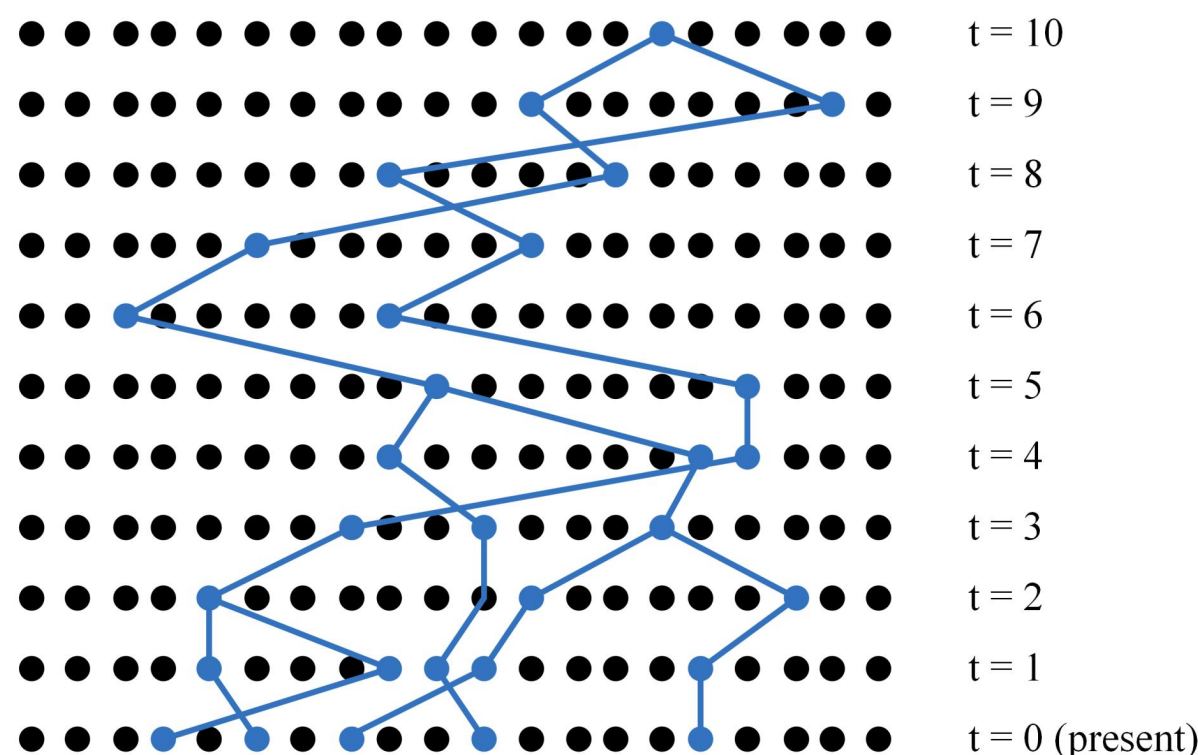

University of Auckland, Auckland, New Zealand

Doctoral Candidate

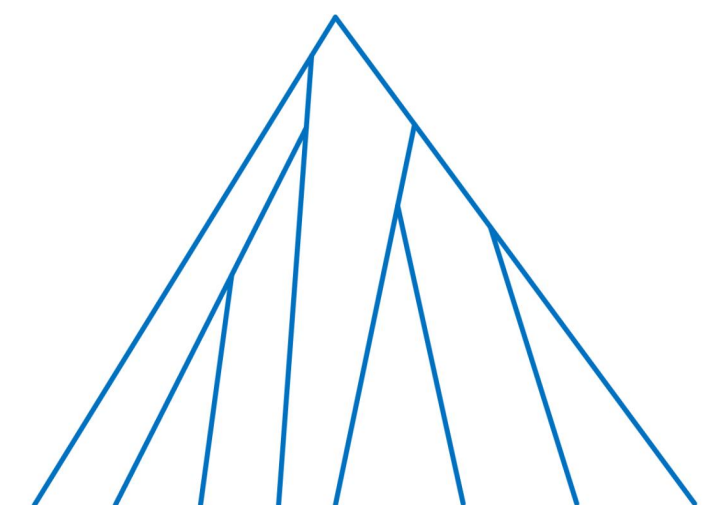

Languages – Chinese, English

Research Interests:

- Phylodynamics
- Coalescent model
- Bayesian model averaging

Constant size
 $N(t) = N_0$

Exponential growth
 $N(t) = N_0 \exp[rt]$

Robert (Haobo) Yuan

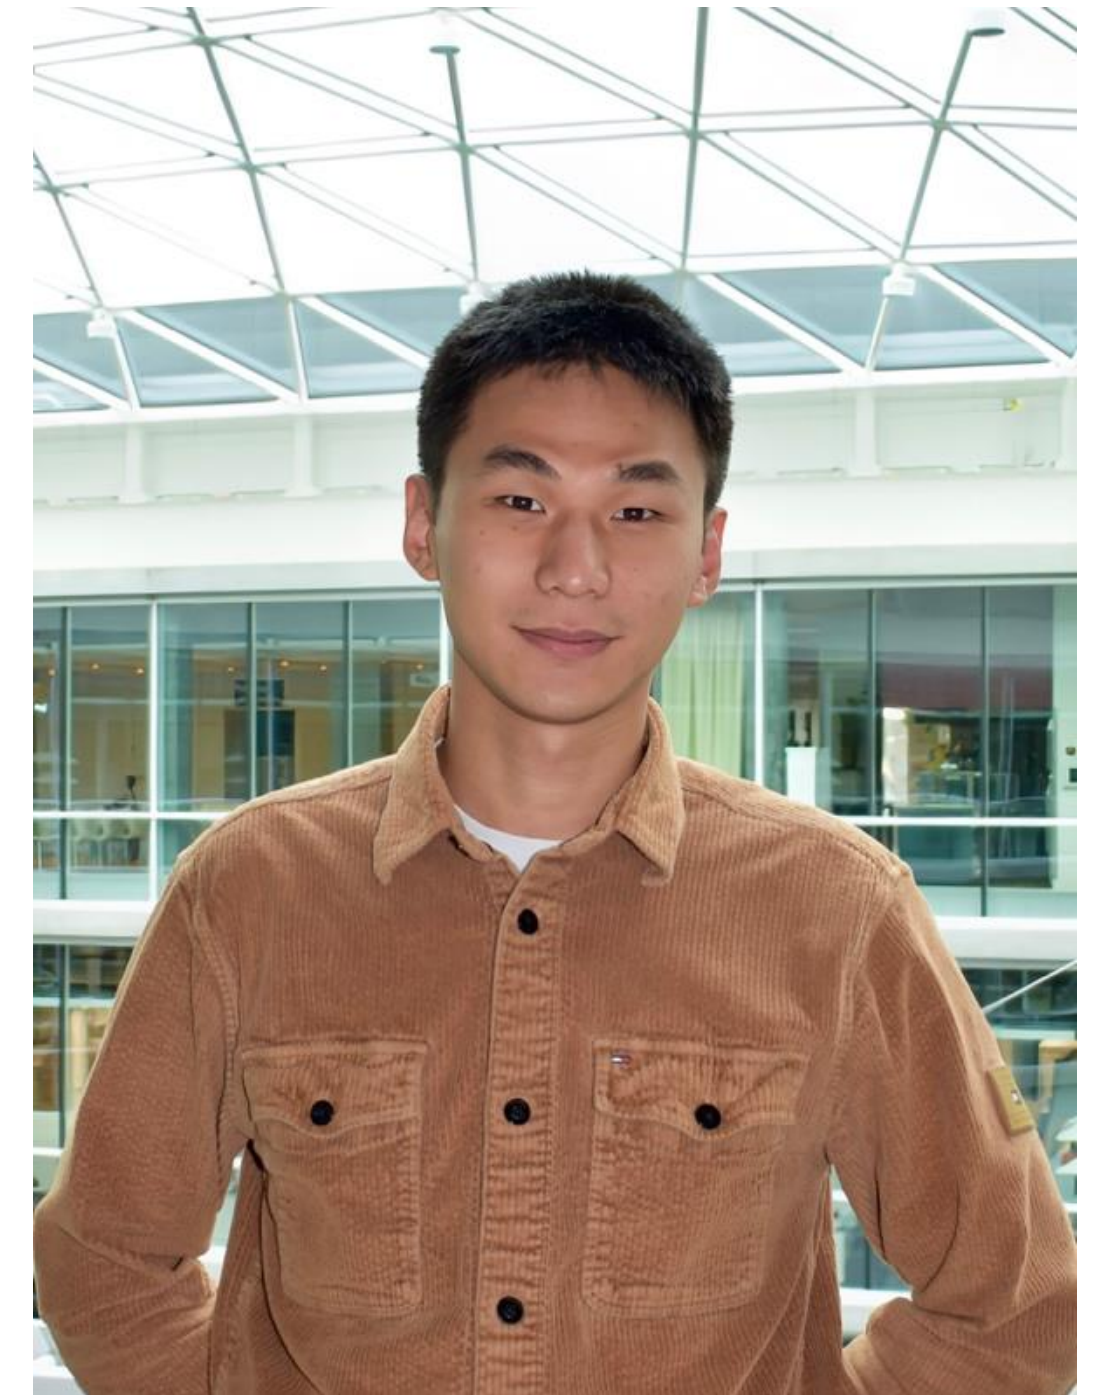

Speaker & Instructor

2nd-year PhD (ETH Zürich)

Languages: English & Mandarin

Research interests:

- Bayesian phylodynamics
- Birth-death models
- Clock models
- Model selection
- Phylogenetics of shrews

Greater white-toothed shrew
(*Crocidura russula*)

© Quentin Martinez

驰 Chi (tʃi:) 张 ZHANG (dʒʌŋ)

- Languages: Chinese, English
- Organizer / Instructor / Logistics
- Research professor (IVPP, CAS)
- I develop computational tools, perform simulations and analyze empirical data
 - Phylogenetics
 - Macroevolution
 - Paleobiology
